WEEKLY MORBIDITY REPORT  
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

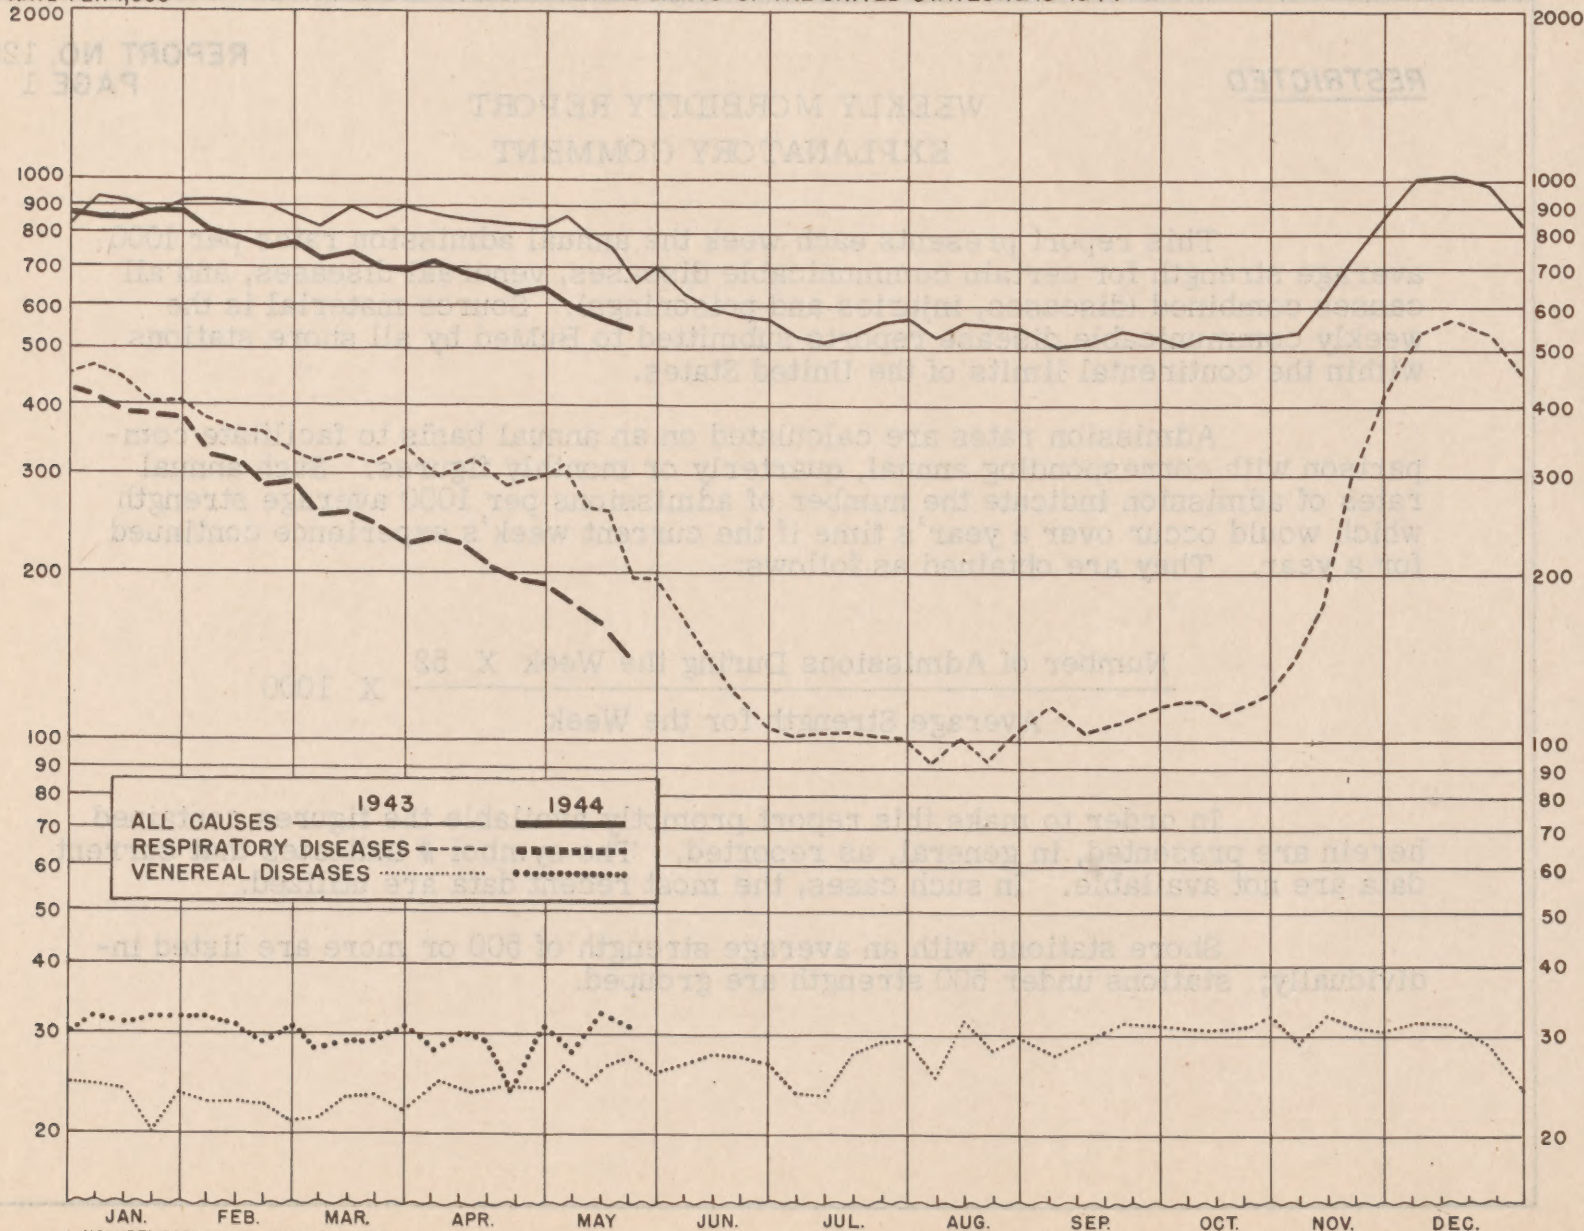

RESTRICTED

FOR CERTAIN RESPIRATORY DISEASES, VENEREAL DISEASES, & ALL CAUSES,  
CONTINENTAL LIMITS OF THE UNITED STATES: 1943-1944

REPORT NO. 125  
PAGE 2

RATE PER 1,000

\*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;  
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;  
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 20 May 1944

The admission rate for All Causes dropped again this week and the curve continues to stand well below the 1943 curve for the corresponding period.

The respiratory disease rate continued its downward course and now stands at the lowest point recorded since the first week of November 1943. The curve turned upward in two Districts, the 7th and 13th. The highest rate (225) was reported for the 13th District, the next highest (190) for the 3rd District, and the lowest (74) for the 6th District.

The rate for the venereal diseases, after a rise the previous week, dropped this week to 31. The curve continues to stand above the 1943 curve for the corresponding period. The highest rate (40) was reported for the 8th District, the next highest (38) for the 5th District, the lowest (18) for the 6th and 7th Districts.

Influenza and Catarrhal Fever. The curve for these infections fell again this week reaching a point lower than was reached even in mid-summer in 1942 and only slightly above the mid-summer low of 1943. The highest rate (156) was reported for the 3rd District, the next highest (147) for the 13th District, the lowest (41) for the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. For the third consecutive week the rate for these infections stood at 3. The curve remains at a point above the 1942 curve and below the 1943 curve for the corresponding week. The 13th District reported the highest rate (11). No other District reported a rate over 5. The 4th District reported no cases.

Pneumonia, Atypical. The rate for the week was 2 as compared with a rate of 3 for the previous nine weeks. This is the first week in 1944 in which the rate was lower than the 1943 rate for the corresponding week. The 11th District reported the highest rate (4), which

CURRENT TRENDS--CONTD.

represents a considerable reduction from the rate of 10 for the previous week. The lowest rate (0.32) was reported from the 12th District.

Tonsillitis and Pharyngitis, Acute. The rate for these infections was 44, a sharp drop over the previous week. This is the lowest rate recorded since the week ending Jan. 1, 1944. The highest rate for the week (89) was reported for the Potomac and Severn River Commands, the next highest (66) for the 13th District, the lowest (22) for the 6th District.

Rheumatic Fever, Acute. The rheumatic fever rate rose to 3 this week. The 13th District reported a rate of 15 and was largely responsible for this high rate. No other District reported a rate over 4.

Scarlet Fever. The scarlet fever rate dropped again this week, bringing the curve to the lowest point recorded since the week ending Aug. 12, 1943. The curve turned upward, however, in the 1st, 12th, and 13th Districts. The highest rate (33) was reported from the 13th District. No other District reported a rate over 5. The 4th, 6th, and 7th Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this infection dropped this week to 0.25, a point above the 1942 curve but well below the 1943 curve for the corresponding week. No District reported a rate above 0.83. Seven Districts and the Potomac and Severn River Commands reported no cases.

Malaria. The rate for malaria continued at 2. For the first time the 1944 curve stands below the 1943 curve. The highest rate (7) was reported from the 11th District, the next highest (5) from the 1st District. The 6th and 7th Districts and the Potomac and Severn River Commands reported no cases.

Measles. The curve for measles dropped to 6 in line with the expected downward seasonal trend, intermediate between the 1943 and the 1942 curves for the corresponding period. The highest rate (13) was reported by the 9th District, the next highest (11) by the 13th District. The lowest rate (1) was reported for the 6th District.
